

FOOT OPERATED HAND SANITISER DISPENSERS

As part of our ongoing battle against **COVID-19** we have developed a new range of hand sanitiser dispensers which will play a key role in the next phase of the current pandemic as employers ramp up their efforts to make their workplace safer for staff and visitors.

EASE OF OPERATION

Fully engineered operational foot step system. The dispensers have an easy screw top system to change / replace the gel. No maintenance is required, simply add the anti-bacterial gel and you're good to go! (5L hand sanitiser bottles are in-stock and sold separately)

SUITABLE FOR ALL LOCATIONS

Our hand sanitiser dispensers are available in a variety of finishes and materials, making them a very versatile solution for all types of indoor and outdoor locations. This is the perfect addition to all reception areas, staff kitchens and restrooms, schools, shop & supermarket entrances, pharmacies, walk-in centres, gyms, pubs & restaurants, staff car parks, cinemas, sport venues, etc

ENGINEERED TO LAST

Our standard dispensers available from stock are manufactured from Grade 304 polished stainless steel. Our heavy duty 10mm thick base plate ensures the unit stability. Additional security features can be added on for outdoor locations at extra cost.

GREAT FEATURES

- Available in 304 stainless steel or powder coated mild steel
- Capacity of either 3.6L or 1L
- Bespoke logo plate option also available
- These dispensers are manufactured in-house and are available for fast delivery

RRP: from £340+ VAT (inc delivery)
